

## CLAIMS

We claim:

1        1. A seat assembly for a motor vehicle having a tub disposed at least partially in a  
2 floor of the vehicle, the seat assembly comprising:

3              a seat cushion translatable on at least one track to a position generally above the  
4 tub, the seat cushion being stowable in the tub.

1        2. The seat assembly of claim 1 wherein the at least one track is disposed generally  
2 laterally in the vehicle.

1        3. The seat assembly of claim 1 wherein the seat cushion has an underside, and the  
2 underside presents a load floor when the seat cushion is stowed in the tub.

1        4. The seat assembly of claim 3 wherein the load floor is generally even with the  
2 floor of the vehicle.

1        5. The seat assembly of claim 1 wherein the seat cushion is rotatable about an axis  
2 generally perpendicular to the at least one track.

1        6. The seat assembly of claim 1 further comprising at least one leg extending  
2 between the seat cushion and the at least one track.

1           7.       The seat assembly of claim 6 wherein the at least one leg is pivotably connected  
2       to the seat cushion.

1           8.       The seat assembly of claim 6 wherein the at least one leg is releasably connected  
2       to the at least one track.

1           9.       The seat assembly of claim 6 further comprising at least one second leg connected  
2       to the seat cushion, the at least one second leg being disposed inboard in the vehicle from the at  
3       least one leg.

1           10.      A seat assembly for a motor vehicle having a floor, the seat assembly comprising:  
2                  at least one track disposed generally laterally in the vehicle;  
3                  a tub disposed at least partially in the floor; and  
4                  a seat cushion translatable on the at least one track to a position generally above  
5       the tub, the seat cushion being stowable in the tub.

1           11.      The seat assembly of claim 10 wherein the seat cushion has an underside, and the  
2       underside presents a load floor when the seat cushion is stowed in the tub.

1           12.      The seat assembly of claim 11 wherein the load floor is generally even with the  
2       floor of the vehicle.

1           13.     The seat assembly of claim 10 wherein the seat cushion is rotatable about an axis  
2     generally perpendicular to the at least one track.

1           14.     The seat assembly of claim 10 further comprising at least one leg extending  
2     between the seat cushion and the at least one track.

1           15.     The seat assembly of claim 14 wherein the at least one leg is pivotably connected  
2     to the seat cushion.

1           16.     The seat assembly of claim 15 wherein the at least one leg is releasably connected  
2     to the at least one track.

1           17.     The seat assembly of claim 14 further comprising at least one second leg  
2     connected to the seat cushion, the at least one second leg being disposed inboard in the vehicle  
3     from the at least one leg.
